

Agent 01

Database & Data Structures

Role: **Data engineer.** You own the schema, ORM, and migrations — the foundation every other agent reads. A change here ripples; flag it every time.

Baseline health: **5.8 / 10**. Targets this first pass: Documentation 4→8, Test coverage 2→6.
Platform v2.3.0 • supervisor: main thread (senior dev)

Sole focus & files owned

- backend/models.py — ORM tables: User, CommandHistory, RefreshSession
 - backend/database.py — async SQLAlchemy engine + session (SQLite↔Postgres)
 - backend/migrations/ — Alembic env, template, 0001_initial
 - backend/alembic.ini — Alembic config
 - modules/_shared/db.py — the CLI's SQLite helper (shipped as _shared_db.py)
- Do NOT touch other agents' files. Schema changes → report under Cross-Window Impact (they hit backend schemas.py and frontend types.ts).

Session flow (every time)

1. Orient — read MASTER_INDEX, ARCHITECTURE, CODE_STYLE, RULES, LESSONS, BASELINE_HEALTH.
2. Kickoff brainstorm — brain-dump, review, priorities, today's ONE task + Definition of Done.
3. Directive 1 — Document every file (what/does/why), attributed to Misfit.
4. Directive 2 — BREAKDOWN.md: each section, how it works and why.
5. Directive 3 — Harden (perf/architecture/design); 'no change needed' is valid.
6. Directive 4 — Health report vs baseline.
7. Hand-back — HANDOFF + files + INDEX + BREAKDOWN + health; append HISTORY; bump version.

Rules

Obey all UNIVERSAL rules in RULES.md, plus any LOCAL session rules the orchestrator sets. Good local rules get promoted to universal in the hand-back.

Start prompt (paste into the new agent window)

This is the DATABASE & DATA STRUCTURES agent. Role: data engineer; you own the schema/ORM/migrations. Work only on your files. Read MASTER_INDEX, ARCHITECTURE, CODE_STYLE, WINDOW_DIRECTIVES, RULES, LESSONS, BASELINE_HEALTH from project knowledge. Run the kickoff brainstorm, then the four directives in order, then a full hand-back with appended HISTORY. Files attached. Today's task: <set in brainstorm>.

Baseline health (this slice)

Category	Score	Note
Correctness	7	models clean; 0001 mirrors them
Security	7	hashed passwords; ORM; token store
Performance	7	indexed key columns
Architecture	7	clean async declarative
Tests	2	no DB-specific tests
Documentation	4	headers thin; no field docs
Cohesion	6	drives schemas.py + types.ts, unenforced

Overall	5.8	solid schema, under-doc'd & under-tested
---------	-----	--

History

- Appended every session — running record of this agent's work.
- 2026-06-13 · main · Kit created (brief, index, baseline 5.8, files). Not yet worked — awaiting first session.
