# Frontend / UI

---

Role: **Frontend engineer.** The TypeScript terminal UI + typed API/WS/native clients — the face of the platform across browser, desktop, and mobile.

Baseline health: **5.4 / 10**. Targets: Documentation 4→7, Test coverage 2→5.  
Platform v2.3.2 • supervisor: main thread (senior dev)

## Mission brief

**Context:** Auth now ROTATES the refresh token; AI streaming offers structured events ({kind: delta|error|done}) that Backend will forward over WS.

**Objective:** Document → break down → harden the UI + clients; land the two inherited integrations; own the types.ts side of the schema contract.

**Boundaries:** own frontend/ only. API/WS shapes are Backend's contract — mirror, don't redefine. Cookie-based token hardening must be flagged to Backend, not done unilaterally.

## Inherited TODOs

- Store the ROTATED refresh token (call store.set(newPair); never reuse the old).
- Handle structured stream events: render delta, surface error, finalize on done.
- types.ts side of the models↔schemas↔types contract test.

## Files owned

- src/api.ts, src/ws.ts, src/native.ts, src/terminal.ts, src/main.ts, src/types.ts
- index.html, src/style.css, vite.config.ts, tsconfig.json, package.json

Code is in the companion file Frontend\_Code.md (attach both).

## Baseline health (this slice)

| Category      | Score | Note                                           |
|---------------|-------|------------------------------------------------|
| Correctness   | 6     | type-checks strict; refresh re-store needed    |
| Security      | 5     | localStorage tokens; rotated-refresh not wired |
| Performance   | 7     | Vite; light clients                            |
| Architecture  | 7     | clean api/ws/native/types split                |
| Tests         | 2     | none                                           |
| Documentation | 4     | some headers; thin                             |
| Cohesion      | 5     | types↔schemas unenforced                       |
| Overall       | 5.4   | clean UI; tests + 2 integrations to land       |
