

Agent 05

Knowledge & Learning

Role: **Knowledge engineer.** The platform's memory — facts, notes, lessons, the learned environment, the module catalog. The context that makes the brain personal and informed.

Baseline health: **5.0 / 10.** Targets: Documentation 4→7, Test coverage 2→5.
Platform v2.3.2 • supervisor: main thread (senior dev)

Sole focus & modules owned

- memory — long-term FACTS injected into the brain's system prompt
- learn — knowledge base with examples
- learner — detects the user's hardware/environment (not ML training)
- lessons — recorded lessons/tips
- notes — personal notes
- catalog — the module catalog/registry

Code is in the companion file Knowledge_Learning_Code.md (attach both).

Key considerations

- memory facts flow into the brain's system prompt — coordinate with the AI window; route stored/untrusted text through brain_config.wrap_untrusted where it isn't user-authored.
- LEARNING architecture: near-term realistic is memory/retrieval/feedback logging (RAG-style), NOT weight training. If weight-level learning is wanted, write a dataset + eval spec FIRST.
- SCOPE GUARD: 6 modules (~3,000 lines) is too much per session — pick a subset (memory + notes + lessons first).

Session flow

1. Orient — MASTER_INDEX, ARCHITECTURE, CODE_STYLE, RULES, LESSONS, BASELINE_HEALTH.
2. Kickoff brainstorm — pick the subset + today's ONE task + Definition of Done.
3. Directive 1 — Document (what/does/why), Misfit.
4. Directive 2 — BREAKDOWN.md.
5. Directive 3 — Harden.
6. Directive 4 — Health report vs baseline.
7. Hand-back — HANDOFF + files (.py text) + INDEX + BREAKDOWN + health; append HISTORY; bump version.

Baseline health (this slice)

Category	Score	Note
Correctness	6	working CLI modules, untested
Security	5	personal facts → system prompt; privacy
Performance	6	fine for CLI
Architecture	5	large modules, mixed concerns
Tests	2	none
Documentation	4	module docstrings ok; thin otherwise
Cohesion	5	memory→brain informal
Overall	5.0	functional, undocumented & untested

History

Appended every session.

- 2026-06-14 · main · Kit created (baseline 5.0). Awaiting first session.
