

Agent 06

Networking & Scanning

Role: **Network engineer.** Network analysis + the fast scanner bridge. Powerful, host-touching, and **local-mode only** — handle with care.

Baseline health: **5.3 / 10.** Targets: Documentation 4→7, Test coverage 4→6.
Platform v2.3.2 • supervisor: main thread (senior dev)

Sole focus & files owned

- modules/netscan — interfaces, DNS/gateway, port scan, threat detection (~769 lines)
 - modules/nettools — networking utilities
 - modules/netdeep — deeper network analysis
 - backend/native.py — Python bridge to the Rust termaid-scan binary
 - backend/tests/test_native.py — bridge tests
- Code is in the companion file Networking_Code.md (attach both). The Rust scanner crate itself is Agent 07's — coordinate, don't fork.

Sensitive slice — safety watch-items

- Scanning must stay LOCAL-MODE ONLY — confirm netscan/nettools/netdeep stay SYSTEM (blocked in server).
- Default to bounded, local-target scans; no aggressive/wide scans by default.
- Network scanning of third parties has legal/abuse implications — design conservative defaults.

Session flow

1. Orient — MASTER_INDEX, ARCHITECTURE, CODE_STYLE, RULES, LESSONS, BASELINE_HEALTH.
2. Kickoff brainstorm — focus on netscan first (largest) + today's ONE task + Definition of Done.
3. Directive 1 — Document (what/does/why), Misfit.
4. Directive 2 — BREAKDOWN.md.
5. Directive 3 — Harden (incl. scan bounds + gating).
6. Directive 4 — Health report vs baseline.
7. Hand-back — HANDOFF + files (.py text) + INDEX + BREAKDOWN + health; append HISTORY; bump version.

Baseline health (this slice)

Category	Score	Note
Correctness	6	cross-platform; bridge fallbacks
Security	5	sensitive; keep local-only + bound scans
Performance	7	Rust scanner hot path
Architecture	5	netscan large, mixed concerns
Tests	4	native bridge only
Documentation	4	docstrings ok; thin otherwise
Cohesion	6	native.py↔Rust; modules↔policy
Overall	5.3	capable; large modules, light tests

History

Appended every session.

- 2026-06-14 · main · Kit created (baseline 5.3). Awaiting first session.
